SUMMARY

Offensive Security Enthusiast & Red Teamer with a focus on vulnerability research and tool development. Proven track record of building creative, impact-driven technical solutions. Passionate about identifying systemic weaknesses. I build projects that make a positive impact on the society. I work well in team environments and am looking for creative ways to break, build, and secure technology.

EXPERIENCE

Cybersecurity and Ethical Hacking, Intern

February 2026 – Present

ApexPlanet Software Pvt Ltd

Executing a series of cybersecurity modules focused on offensive security and system defence. Translating complex technical requirements into actionable security tests, I identify critical infrastructure weaknesses.

- Performing vulnerability assessments and technical exercises to identify security flaws and strengthen system defences.
- Applying ethical hacking methodologies and security frameworks to conduct hands-on testing and improve organizational security posture.

PROJECTS

1. Qubo Labs – Smart Attendance Monitoring System

- Developed a smart attendance system for large events/auditoriums using static seat-based QR codes.
- Designed a verification mechanism using a blockchain-inspired linking pattern to eliminate proxy attendance.
- Tools/Tech: HTML, CSS, JS, PHP, MySQL, WebAuth and other JS Libraries.
- Link: github.com/alvinson-tech/qubo-labs

2. Carbonwise – AI-Powered Carbon Credit Marketplace

- Built a web platform to buy and sell verified carbon credits from Indian sustainability projects.
- Used AI for project verification, dynamic pricing, and chatbot-based user assistance.
- Tools/Tech: React, TypeScript, Node.js, Tailwind CSS, PostgreSQL.
- Link: github.com/alvinson-tech/carbonwise

3. MANOVOX – Sign to Speech Converter Prototype

- Built a real-time sign-to-speech converter using ESP32-CAM for accessibility support.
- Tools/Tech: ESP32-CAM, Computer Vision using YOLOv5.

EDUCATION

MVJ College of Engineering

2023 - 2027

Bachelor of Engineering in Computer Science

Cumulative GPA: 9.05

St. Vincent Pallotti PU College

2021 - 2023

Grade 12, Cumulative Score: 88.83%

SKILLS & OTHER

Technical Skills: Web Dev (HTML, CSS, JS), Programming Languages (C, C++, Python), Git & GitHub, Linux OS.

Other Skills: Leadership, Event Management, Collaboration & Communication, Problem Solving.

Interests: Ethical Hacking & Cybersecurity, Robotics & Automation, Open-Source Contributions.

Languages: Fluent in English and Malayalam. Conversational Proficiency in Hindi, Kannada and Tamil.

ACTIVITIES

- Involved as Youth Member at SJC, conducting workshops and events.
- Participated in Vibeathon – 36hr Hackathon Competition, hosted by Polaris School of Technology.
- Worked on multiple Robotics projects using Arduino/ESP32 development boards.
- Created UI/UX design assets for projects using Canva/Figma.
